SUMMARY

- 13 years of experience working with MNCs like Cisco Systems, Samsung, Yahoo, & Hewlett Packard.
- Currently working as Sr. Tech Lead with Cisco Systems, Bangalore from March 2013.
- Proven experience in architecting large scale web applications using MERN stack.
- In-depth expertise in design & development of distributed systems using AWS including S3, EC2, NoSQL, VARNISH, HAProxy, Stunnel, NginX, etc.
- Expert knowledge of HTML5, JavaScript(ES5/ES6), CSS, Nodejs etc.
- Strong experience in developing complex frontends using frameworks like React.js, Angular.js, PostCSS, etc.
- Strong background in OO Design and Development including design patterns.
- Outstanding motivator with experience in working with Agile-methodologies.
- Good mentoring and supervisory skills with vast experience in managing and prioritizing under tight deadlines
- Excellent organizational and communication skills.
- Exposure to Bigdata and Hadoop ecosystem.

EDUCATION

- Post-graduated from BITS, Pilani in 2009 with a MS degree in Software Systems.
- Graduated from R.V. College of Engineering, Bangalore in June 2005 with a B.E degree in Information Science and Engineering.
- Passed C.B.S.E XIIth from J.N.M School, Dhanbad in 2000.
- Passed C.B.S.E Xth from Delhi Public School, Dhanbad in 1998.

SKILLS

UI Frameworks:

React.js, Redux, Bootstrap, Foundation.

Web:

HTML5, XML, CSS3/PostCSS, ES6/Typescript, WebSockets.

Languages:

JavaScript (ES5/ES6), Java, PHP, C, C++, Perl.

Units & E2E Automation:

TDD/BDD (Jest, Enzyme, Jasmine), Protractor.

Backend:

Node.js, Express.js, Jersey.

Database:

MySQL, NoSQL (Mongo DB, Redis).

PaaS: AWS (EC2, S3, Cloudfront, ROUTE 53), Heroku, Linode

Web Stack:

VARNISH, HAProxy, Stunnel, NginX, Nodejs.

System:

Multi-threading, Networking, and System Programming.

Versioning Systems:

Git (Github, Gitlab, Bitbucket)

EXPERIENCE

Cisco Systems

Sr. Tech Lead / Mar 2013 - Present

- Leading a team for ReactJs based UI Framework development.
- Design and development of HTML5 and ES6 based solutions for Cisco Unified Contact Center.
- Identifying non-functional requirements such as performance, browser compatibility, security, portability and scalability of the application.
- Responsive and scalable designs using React.js, Angular.js, bootstrap, foundation, etc.
- TDD and BDD (Jest, Enzyme, Jasmine) and E2E functional automation (Protractor).
- Reviewing design produced by team and ensuring consistent implementation of solutions across related products.
- Scrumban, Kanban, Scrum, Agile methodologies.

Eros International

Technical Lead / Sep 2011 - Mar 2013

- Overall backend development of web applications (ErosNow & ErosNow Analytics) including Nodejs, Java, JavaScript, VARNISH, HAProxy, Stunnel, NginX, etc.
- HTTPS, REST APIs for catalog (Movies / Music videos / Short Content, etc.)
- User/Session Management, Social Network Login
- Frontend development using HTML5, CSS3, JavaScript, LESS, Jade, etc.
- Movie Subtitles, Online Subscription, Advertisement (Preroll, Companion, etc.)
- Optimization & performance tuning for iPad & IE, Google Analytics.

Samsung

Lead Engineer / June 2009 - Sep 2011

- Leading a team of application framework development for SAMSUNG bada platform.
- Reviewing code changes, refactoring, optimizing codebase as per requirement.
- Worked for design & development of modules in webkit based Samsung mobile browser.
- Worked for implementation of features & solving critical issues related to rendering.
- Mentoring & training new comers in C++, web technologies & tools.
- Received "Super Saver Award" for contribution towards total cost reduction of mobiles by developing webkit based web-browser.

Yahoo

Senior Software Engineer / May 2008 - June 2009

- Design & development of yahoo participation platforms.
- Implementation of new features based on PRD (project requirement document).
- Updating REST APIs as per application requirements.
- Participating in low-level design & architecture of component interfaces at API level.
- Reviewing code changes & providing unit-tests for various use-cases.
- Recognized for making end-user experience better by utilizing time-zone information for deciding time of subscribing for yahoo alerts.

Hewlett Packard

Software Engineer / June 2005 – May 2008

- Unit-tests for APIs sanity checks supported by libIO on HP-UX 11i.
- Porting various thread-unsafe components of libIO thread-safe using TLS.
- Key contributor and developer in IPMI team. Developed IPMI Tool in C++. IPMI Tool was OS* application, where OS* is a light-weight OS based on EFI (Extendible Firmware Interface).
- Design & development of VOIP based solution on Windows Mobile Platform.
- Windows Mobile 5 SDK based TAPI (Telephony API) functionality Integration of lower level features with higher level abstraction using VC++ based UI.
